

Research Report 2023

Dear Reader!

The following report represents various research activities that happened at “Karlshochschule International University’ in the year 2023. While being situated in a challenging context, we have kept an academic culture alive and continued our research work related to cultural and economic dimensions as well as civil-societal, and socio-political investigations with a critical as well as inter- and transdisciplinarity focus.

With its pluralistic [academic orientation](#) all our research activities aim at reflecting and contributing to a sustainability-, justice- and responsibility-oriented *transformation* of society, economy and organisations as well as individuals. This orientation is present in these examples of ongoing research projects at Karls:

Innovative Research Project "Future Democracies"

Led by Prof. Dr. Dr. Björn Bohnenkamp, this project, titled "Future Democracies," is a real-world laboratory funded by FH-Personal from the BMBF and the state of Baden-Württemberg. It focuses on collaborative research transfer with civil society organizations.

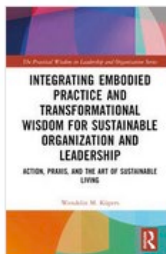

Exploring Utopian Potentials in Current Crises

Prof. Dr. Nadja Meisterhans spearheads a DFG-funded research project, delving into the utopian possibilities emerging from contemporary crises.

Collaborative Comparative Policy Research Initiatives

The university engages in additional research projects in comparative policy research. These are funded by the Economic and Social Research Council (ESRC UK) and involve partnerships with prominent institutions such as the universities of Bielefeld, Birmingham, Sheffield, Melbourne, and the Nuffield Council on Bioethics, under the guidance of Prof. Dr. Robert Lepenies.

Integrating Embodied Practice and Transformational Wisdom for Sustainable Organization and Leadership: Action, Praxis, and the Art of Sustainable Living

1st Edition

Forthcoming

By **Wendelin M. Küpers**

While being a university of applied science and thus interested in practically relevant applicable research related to professional and societal or business realities, Karlshochschule aspires also to pursue rigorous foundational, cross- and transdisciplinary research. With regard to latter one we aspire to and make more and more publically known that we are a ‚transversity‘ in which a transformative education (Bildung) and research in service of academy and society is realised.

Like in the research reports of the past, the titles and descriptions you will read here related to the broad range of various research publications and activities manifests a critical reflection on important highly relevant issues and problems of our time. This is also expressed in the titles of the theses of our Bachelor and Master students at the end of this report.

Overall, this report confirms that Karlshochschule continues to be a resonant and thriving place for critical thinking and „Bildung“, moving on confidently, trying to contribute for making a difference.

Wendelin Küpers

Table of Contents

Introduction

1. Books and book chapters or entries in encyclopedia
2. Publications in Academic Journals
3. Conference Contributions and Public Presentations
4. Magazines and Popular Science
5. Research Outlook / Media (including contribution to social media, blogs etc)
6. Service for Scientific Community and Memberships
7. Student Research (BA und MA Theses)

1. Books and book chapters or entries in encyclopedia
